JNPT Antwerp Port Training and Consultancy

Port of Antwerp Bruges
International

A smart port connecting smart people

WHY

Health, Safety, Security, Environment and Quality are an ever-present priority for port authorities and port operators. The health, safety and security of people working in ports as well as quality and environmental related aspects are an essential part of operational excellence and contribute to a sustainable growth for a port environment.

It is therefore crucial to have a well-thought health and safety programme at hand that finds support throughout the whole organisation.

Furthermore, the port authority and the port companies have their role in matters on port security.
Both must take up their responsibility in creating a safe and secure port environment.

A quality management system can help to document policies, processes and procedures in order to achieve quality policies and objectives.

FOR WHOM

This programme is open to port professionals or governmental bodies involved in Health and Safety at the workplace &
Security and Environmental related aspects in the port and terminal area.

Course fee: Rs 100 000

The course fee covers the course material, airport pick-up / drop off, accommodation (5 nights in a twin sharing room) and all meals and beverages (no GST included)

* A single room can be provided at an additional cost of Rs 20 000 and is subject to availability
